RE: REM Inc. - Bay Area-wide Trash Capture Demonstration Project Proposal

Dear Ms. Janet Cox:

We appreciate the opportunity to submit a proposal for the San Francisco Bay Area-wide Trash Capture Demonstration Project.

REM TRITON Bioflex Trash Guard (BFTG) filter inserts are designed to meet the "Full Capture System" specification as defined S. F. Bay Regional Water Quality Control Board. REM submitted certification documentation directly to Dale Bowyer at the SFRWQCB on January 19, 2010, and is pending approval. The filters are classified as a "small device" for this project.

REM TRITON BFTG filter inserts are modular in design allowing maximum trash capture capacity, treatment flow, and customization for each unique size and shape catch basin structure found in the San Francisco Bay Area. REM filters are engineered with ample overflow bypass capabilities, and designed for ease of maintenance and safe containment during trash removal. REM TRITON BFTG filters have been installed and field tested in numerous municipal catch basins throughout Northern California including those that serve as official field "Test" units in Concord, Pleasant Hill, and Dublin, CA.

REM Inc. is an industry leading innovator, manufacturer, distributor, installer, and O&M service provider for catch basin filters (and all other stormwater treat systems) since 1996. Based and headquartered in the San Francisco Bay Area (Concord, CA), REM maintains a field office in Santa Ana handling Southern California as well. We directly serve customers throughout North America and distribute our filter products through industry leading partner companies including Contech Stormwater Solutions.

REM, Inc. certifies that the firm or any party associated with the firm is not ineligible for participation in federal assistance programs under Executive Order 12549; and that REM or any other party associated with the firm is not on ESEPA's List of Violating Facilities.

We invite you to call (925) 676-4736 to speak to us directly, or you can email me at marcel@remfilters.com with any questions or concerns. We have provided a significant amount of information; please do not hesitate to contact us for further clarification.

We look forward to working with you on this project.

Best regards,

Marcel Sloane
