

DURACAST MARKERS

Product

Specification

DRAIN AND CURB MARKERS

DRAIN & CURB MARKERS

- Easy to use; requiring no special tools or surface preparation.
- Durable; making costly re-marking unnecessary.
- Attractive; providing a uniform professional appearance.
- Made from a .030" proprietary white plastic with UV inhibitors and a layering of materials for flexibility and impact resistance.
- The printing is on the face of the material which is then covered with a layer of UV clearcoating for UV and abrasion resistance.
- A .060" polyurethane "dome" is applied to the face of the marker. This optically clear, self-healing, non-yellowing Duracast surface protects against mechanical and chemical abrasion.
- The Duracast surface effectively doubles U.V. resistance as well.
- 12-Year warranty.
- It's available in stock titles or custom manufactured to virtually any size, shape or number of colors.
- Our markers are less expensive than brass or ceramic or thermal plastic, won't crack and crumble (ceramic), won't bend exposing sharp edges (aluminum), won't tarnish (brass), and have no scrap value (brass & aluminum).
- REM offers a variety of custom printed collateral items to support your marking program. Door hangers to inform the public, buttons, refrigerator door magnets, and sports bottles.

MODEL SDF

DURACAST DRAIN AND CURB MARKERS

Public education and outreach is part of the National Pollutant Discharge Elimination System (NPDES) requirement.

Storm drain marking is an established method of involving the public and increasing community awareness about non-point source pollution.

Unfortunately, storm drain marking using spray painted stencils is messy, time consuming, and contradictory to the environmental message being presented (it eventually washes down the "protected" drain). It's also ultimately quite expensive as it must be re-done every couple of years.

Our storm drain marker is the only performance proven alternative available.

Easy Installation

1. Clean Surface

Make sure application surface is flat, dry and free of any loose debris.

2. Apply Adhesive

Coming in 1/8" from the outside edge of the marker, apply a bead of adhesive and then work in to the center.

3. Stick It!

Apply the marker to the application surface pushing down **HARD** forcing adhesive out around the entire edge. It is important that the entire edge of the marker is sealed to the application surface.

Standard Dimensions

Round Duracast Markers:

4" Diameter

Oval Duracast Markers:

Regular: 3.25" x 4.75"

Large: 7.75" x 4.75"

Adhesive

Curb Marker Adhesive® #RS-222

Available in 5 oz. or 10 oz. tubes
